- 22—NAL Practice @Home @3:45
- 26-29—Girls BB Intramurals
- 30—Honor Roll Breakfast

Science—Ms Engelking—We will start the month of October wrapping up our focus on the periodic table and move on to how elements combine to form molecules. We will complete our unit studying the states of matter and particle motion within each state followed by how matter changes during physical changes and chemical reactions.

Be sure to be checking our class website each week for our homework assignments.
<http://msescience.weebly.com>

Language Arts—Mrs. McGuire—We are finishing up our Relationship unit next week with a writing sample. Next, we will move on to our “Hero” unit. There, we will be reading several stories about true hero’s, writing, taking quizzes and talking about the right and wrong of posting online. Please encourage your students to read each evening and also to practice reading out loud, since some of our reading assessments are read out loud. This will help to improve your students reading scores. With Fall and cooler temperatures upon us, this is a great time to snuggle up with a book in the evenings.

Math—Mrs. Demel—Unit 2 will deal with the number system including natural numbers, whole numbers, positive fractions, positive decimals, and we will begin working with integers and their real world context including the meaning of absolute value and on a coordinate plane.

Note: Parents and students also have access to the student website where they can get homework help, interactive practice tests and much more. The information below will enable you to use the online textbook by going to the following link:

Social Studies-Mr. Griffin—The month of October brings us to finishing up our unit on Mesopotamia. The following unit will have us studying Ancient Egypt and Kush. We will discover and discuss the rich culture of Egypt along with the government by the pharaohs, the geography of the land, economics with a strong connection to trade with surrounding countries and far away countries. Students will be able to compare Egyptians use of the Nile to that of the Sumerians use of the Tigris and Euphrates Rivers. We will work on vocabulary, maps of the region, projects and discussions. Please send glue sticks for my class and also tissues to your first hour teacher. In the middle of October we will start writing our fall essay over Hammurabi and his laws. This essay will be done entirely at school.
