

TODAY WE WILL DISCUSS **SPEED**. PUT SIMPLY, SPEED IS HOW MUCH **DISTANCE** AN OBJECT TRAVELS OVER **TIME**.

IN DISTANCE-TIME GRAPHS, THE **SLOPE** OF THE LINE REPRESENTS **SPEED**. THE **STEEPER** THE SLOPE IS, THE **FASTER** AN OBJECT IS GOING.

LET'S EXAMINE THIS CONCEPT IN ACTION DURING **OWEN AND CLARISSA BIRDLEY'S** AFTERNOON WORKOUT.

I KNOW IT MUST SEEM ODD THAT I CAN KEEP UP EVEN AS YOU ROLLERBLADE...

...BUT YOU HAVE TO REMEMBER THAT I'VE BEEN RUNNING LONG DISTANCE FOR YEARS!

GOT ANY WATER?
